

Technical catalogue

Compression fittings

Reference standards

Production of the ASTORE compression fittings is carried out according to the highest quality standards and in full compliance with the environmental restrictions set by the applicable laws in force and in accordance with ISO 14001.

All products are made in accordance with the quality guarantee system in compliance with ISO 9001.

- **UNI 9561**

Pipe and fittings in thermoplastic material, compression fitting mechanical jointing for PE pipe pressure

- **ISO 17885**

Plastic piping systems – Mechanical fittings for pressure piping systems specifications

- **ISO 7**

Fittings with pressure-tight threaded joints

- **UNI EN 12201**

Plastics piping systems for water supply, and for drainage and sewerage under pressure – Polyethylene

- **EN 10226-1/2**

Pipe threads where pressure tight joints are made on the threads.

Part 2: Taper external threads and taper internal threads – Dimensions, tolerances and designation

- **ISO 4427**

PE pipe system for water supply

Approvals and quality marks

- **DVGW**

ASTORE compression fittings are certified as suitable for coming into contact with water intended for human consumption according to the Deutscher Verein des Gas und Wasserfaches. for further info on the certificated range, please contact Marketing dept.

COMPRESSION FITTINGS

Astore PP compression fittings are joints for PE pipes dedicated to water adduction systems.

They can be used both in irrigation field and drinking water systems.

COMPRESSION FITTINGS

- The joints provided with threads have a metal reinforcement on the external part of the thread, leaving from R 1 1/4".

Technical specifications	
Size range	d 16 ÷ d 110 (mm)
Nominal pressure	PN16 with water at 20 °C from d 16 (mm) to d 63 (mm), PN10 with water at 20 °C from d 75 (mm) to d 110 (mm)
Temperature range	0 °C ÷ 60 °C
Reference standards	Astore compression fitting is manufactured in compliance with the requirements of standards UNI 9561, ISO 17885. The joints can be installed on PE pipes which are in compliance with standards ISO 4427, UNI EN 12201. The threaded versions are manufactured in compliance with standard ISO 7-1.
Fitting material	Body and nut in polypropylene black co-polymer, clinching ring in white POM resin.
Seal material	O-ring in NBR. Reinforcement ring in AISI 430.

COMPRESSION FITTINGS

COMPONENTS

EXPLODED VIEW DN 10÷50

DN 10 ÷ 50

- 1** Nut
- 2** Clinching ring

- 3** O-ring
- 4** Body

EXPLODED VIEW DN 65÷100

DN 65 ÷ 100

- 1 Nut
- 2 Clinching ring

- 3 Thrust bushing
- 4 O-ring

- 5 Body

INSTALLATION

INSTALLATION D 16÷40

1. Cut the pipe at 90 ° to its axis using a pipe cutter (figure 1).
2. Any burrs and chips resulting from the cutting must be removed.
A small chamfering at the end of the pipe will make the assembly easier.
3. Loosen the joint ring nut to the last thread engaged (the fitting doesn't need to be dismantled).
4. Insert the pipe joint ring into the fitting to the beat and tightly screw the ring nut (figure 2 and 3).

Fig.2

Fig.3

INSTALLATION D 50÷63

1. Cut the pipe at 90 ° to its axis using a pipe cutter (figure 1).
2. Any burrs and chips resulting from the cutting must be removed.
3. Insert on the pipe these items in the following order: the ring nut, the clinching ring and put the o'ring onto the pipe inlet. Before carrying out this operation, lubricate the pipe and the seal to ease the insertion (figure 1).
4. Insert the fitting body until the seal beats in the body (figure 2).
5. Tightly screw the ring nut with the proper spanner (figure 3).

Fig.1

Fig.2

Fig.3

INSTALLATION D 75÷110

1. Cut the pipe at 90 ° to its axis using a pipe cutter.
2. Any burrs and chips resulting from the cutting must be removed (figure 1).
3. Insert on the pipe these items in the following order: the ring nut, the presser bush, the o-ring and the fitting body. Before carrying out this operation, lubricate both the pipe and the seal to ease the insertion (figure 2).
4. Tightly screw the ring nut to allow the introduction of the seal until it beats in the body. Unscrew the ring nut, open the clinching ring and insert it into the pipe (figure 3).
5. Tightly screw the ring nut with the proper spanner.
